DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 53-57 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakata et al. (US 6276772).

Regarding to claim 53:

Sakata et al. discloses an apparatus comprising:

droplet ejection devices (*FIG. 1-2*) each comprising an element (*FIG. 1-2, element 1*) to change a volume of a fluid chamber (*FIG. 1-2, elements 3 and 6*) of one of the droplet ejection devices, the element having an electrical capacitance (*FIG. 5*); and

control circuitry to effect uniform velocities of droplets ejected from at least two different ones of the droplet ejection devices by providing respective charge voltages or charge currents to the volume changing elements to individually control a charge on each volume changing element (*Abstract*).

Regarding to claim 54: wherein the control circuitry effects uniform droplet velocities also by providing respective discharge voltages or discharge currents to the volume changing elements (*FIG. 8a-b, 15a-b*).

Regarding to claim 55: wherein the control circuitry comprises discharging control switches (*FIG. 3, element Tr2b*) to connect or disconnect discharge voltages or discharge currents to respective elements to discharge the respective electrical capacitances (*FIG. 3, element 1a*).

Regarding to claim 56: wherein the control circuitry comprises charging control switches (*FIG. 3, element Tr1*) to connect or disconnect charge voltages or charge currents to respective elements to charge the respective electrical capacitances (*FIG. 3, element 1a*).

Regarding to claim 57: wherein the volume changing element comprises an electrically actuated displacement device (*FIG. 2, element 1*).

Response to Arguments

Applicant's arguments with respect to claims 53-57 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
